

100 Watt Internal Fitting RSF30

The RSF30 series is a range of higher power side entry, internally fitted devices. These may be used for directly switching some small loads of less than 100VA. Mounting of this series requires access to the inside of the tank. They are manufactured in Nylon or Polypropylene, with a choice of gasket materials, to suit most commonly used liquids.

The switch action may be reversed by rotating the device through 180°.

- 100W contacts
- Rugged design
- Reliable reed switch contacts
- WRAS approval
- Many variants are UL recognised components file number E171218
